

## Items needed:

- 8 1/2" X 11" paper
- 8" and 12" wood dowels or skewers
- string or ribbon
- crepe paper streamers
- tape

## Instructions:

Start by folding the top corners of the paper, similar to a basic paper airplane design. The folded corners should meet together in the middle. Then place the 12" dowel down the middle of the paper and tape it in place. Place the 8" dowel perpendicular across the top of the 12" dowel. It should sit just below the paper you folded down. Tape it down as well.

Now tie your string where the dowels meet. Carefully tie the paper streamer to the end of the 12" wood dowel to create the kite tail. The streamer paper is a bit fragile, so you can add a piece of tape over the knot. Then fold (and tape) the bottom corners of the paper inward to finish the kite design.
